

How to Shop by Mail

Following each classification below is the announcement of a progressive, reliable concern, which is prepared to offer the "Mail Order" trade, particularly farmers and those who desire service from the convenience of the city stores. Owing to the extension of the rural free delivery service throughout this section, it is no longer necessary to "come to town" to do your shopping. Simply make your selection from the goods listed below, or write for information, and your goods will be mailed, and will be delivered to your door by mail. The concerns listed on this page are selected as representative and may be classed as headquarters in their particular lines. When writing for catalog or information, always mention The Times-Dispatch.

MORE Criticism of Naval Reorganization Suggested by Secretary.

WASHINGTON, D. C., December 25.—The opposition at the Capitol to Secretary Meyer's naval reorganization plan appears to be increasing. The members of the House Naval Committee who heard the secretary explain his scheme yesterday in the minds of Chairman Foss and his associates as to the wisdom of incorporating in the naval appropriation bill, as reported from the House committee, any legislation which would install Mr. Meyer's plan with greater permanence than it is possible to do by departmental order.

So long as Mr. Meyer adhered to changes possible to make by regulation the members of the House and Senate Naval Committees stood by him. There is an inclination, however, to look more searching into the whole proposition before adopting any of these new forms of appropriation bill recommended by Mr. Meyer and involving transfers of duties from one bureau to another, chiefly relating to appropriations under the Bureau of Construction and Repair and the Bureau of Steam Engineering.

It has been learned also that Mr. Meyer evidently desired to have executive functions reposed in the new naval aids for inspection, personnel, material and operations, since he recently called on the Attorney-General for an opinion as to the legality of any of these officers acting as head of the department in the absence of the secretary and assistant secretary. The Attorney-General has rendered an opinion to the effect that such duties cannot legally be transferred to the naval aids, and that this is a function which would require legislation.

Mr. Meyer has already been informed by the chairman of the House Naval Committee that neither that committee nor the Senate Naval Committee is in favor of any legislation which will give legal status to the naval aids or accomplish anything which resembles the creation of a general staff, to which Congress, for some reason, is unwillingly opposed. It looks now, if the House Naval Committee would do little in the way of changing the naval appropriation bill in the direction recommended by Mr. Meyer. At all events, if any of these recommendations are adopted, they are likely to cause trouble at the Senate end. It is understood that representations to this effect have been made to Mr. Foss.

Time was, and it has not been so very many years ago, when very few cattle were raised in Nelson, but these conditions have radically changed, and many of the large land-owners have turned their attention to grazing. The negroes does not grow voluntarily here, but the soil will bring this and other kinds of grass successfully when it is sown, and as a result there are many farmers wintering large numbers of cattle now, and several years ago paid no attention to this important and profitable industry.

Sheep-raising is apparently on the increase in the county. A sheep will live here almost as long as a cow, and will starve, and for this reason there is much profit in the business.

The timber industry of Nelson should not be overlooked, for it is one of the largest and most profitable of all. The county is intersected with a chain of valuable mountain ranges, and much of the timber on them is just now being developed. Tan bark, railroad ties, poplar wood for pulp, chestnut for fuel, and other kinds of timber of marketable value may be found in these mountains, and large quantities of it is shipped daily to various parts of the county.

far can be learned, in favor of general betterment of present conditions. But the road fever in Virginia and the South is contagious, and it is believed that it will attack the citizens of Nelson in due time, and that their roads will be made to keep pace with other lines of civilization, which are so marked among them.

MEMBERS OPPOSE PLANS OF MEYER

More Criticism of Naval Reorganization Suggested by Secretary.

WASHINGTON, D. C., December 25.—The opposition at the Capitol to Secretary Meyer's naval reorganization plan appears to be increasing. The members of the House Naval Committee who heard the secretary explain his scheme yesterday in the minds of Chairman Foss and his associates as to the wisdom of incorporating in the naval appropriation bill, as reported from the House committee, any legislation which would install Mr. Meyer's plan with greater permanence than it is possible to do by departmental order.
